

## Send Mama Packing with Sun Mountain's Club Glider

Mama's ready for a golf vacation and Sun Mountain's Club Glider travel bag is just what she needs to make the trip easy. It is the only golf travel bag that offers extendable legs and wheels to support 100% of the weight, while eliminating the repeated bending and lifting required with traditional travel bags. It certainly looks fashionable and functions well to protect clubs with additional room to store more stuff.

This writing is in flight and I can tell you that when I jumped out at the airport curb check-in and the wheels and legs flew into a supported position from the car, people actually said, "Wow!" That is how impressive it is. Amazingly, the additional leg extensions do not make it heavier than average bags, which is so important to be able to include more fashions inside.

Always confirm with the airline that this is acceptable as one fellow writer ran into trouble with restrictions on the golf travel bag contents. To date we have not had an issue but we confirm with the airlines for each trip in advance.

The Club Glider is so innovative that it made the cut from over 1,000 entrants in the *Golf Channel* "Fore Inventors Only" reality show and was named one of five finalists in this search for the next great golf invention. Following a successful introduction, Sun Mountain increased the offering to include additional models. ClubGlider Meridian is the name of the original ClubGlider. ClubGlider Pro is the largest of the models made to accommodate tour players' oversized staff bags or two light weight carry bags. ClubGlider Journey is a smaller and lighter version.

The extendison legs that support 100% of the bag's weight, eliminate on average over 45 pounds of pressure from the golfer's shoulders and back. ClubGlider can also be loaded while standing, eliminating the need to bend all the way over as with other travel bags. Additionally, with the ClubGlider, the repeated bending and lifting while waiting in line is a thing of the past. ClubGlider is simple, fast and easy to use with retractable legs and wheels that lock securely for travel. ClubGlider includes heavy-duty two-way zippers, thick foam padding extending down the travel bag to protect club heads and shafts. It includes storage pockets, internal cinch straps, reinforced wear areas, and a lift-assist handle. Thrill Mom with this travel bag and she will thank you on every trip.
